Last year, the ASBMB responded to the NIH request for information for its strategic plan for research on the health of women. In our [comments](#), we recommended that the NIH Office of Research for Women's Health streamline its re-entry and re-integration supplements.

3. Please provide links to any studies (published or unpublished) on the efficacy of these policies or programs.

The following are reports and articles with unpublished data on the effectiveness of re-entry and re-integration programs:

[Keeping Scientists in Science: NIH Re-Issues Re-Entry Supplements Funding Opportunity](#), An
