Ankita Arora is an RNA researcher and science writer who is passionate about biotechnology, rare diseases, genomics, global health and science policy. She loves to share her passion for science with nonscientists by bridging the gap between researchers and the public. She has participated in the ASBMB Advocacy Training Program, the ASBMB Today volunteer contributors program and the eLife community ambassador program. As a woman in STEM with lived experience in three continents, she has advocated for implementing DEI practices in STEM with a focus on international scholars.
